

Custom Designed Screening Media Solutions

Leaders in Modular Screening

The Screenex Difference:

- ❖ Individual screen panel systems designed to give the optimum performance for each individual application
- ❖ A customer first philosophy
- ❖ A co-operative relationship to improve the profitability of both parties, working with site personnel to achieve the best solutions and results

Product Range

At Screenex, we manufacture our patented range of Screenex modular panel systems by injection moulding process. Our quality polyurethane and rubber screening media are specially designed for maximum durability and simple maintenance. Our philosophy that each Screenex system is designed to each customer's individual requirements ensures that our customers are buying a world class product. Our unique system allows damaged sections to be easily replaced, rather than the entire screen. This revolutionary design cuts time and maintenance costs and increases screening efficiency.

Screenex was founded in 1983 and our existing management have a combined experience in the mining industry of over 100 years. Regional market leaders in Australia, we specialise in the design, manufacture and service of modular screen panels. Screenex's modular screen panels offer the benefits of wear resistance and accurate screening in a lightweight system that is designed to reduce maintenance and downtime.

Screenex's leading edge technology is patent protected and highly respected by our customers in both the OEM and end user markets. We have built our success on providing the best possible screening solutions to our customers, no matter what the application.

In 2008, Screenex Pty Ltd ("Screenex") joined the Schenck Process Group, a global market leader of solutions in measuring and process technologies in industrial weighing, feeding, screening and automation.

Polyurethane

Modular | Cross Tension | Sieve Bends

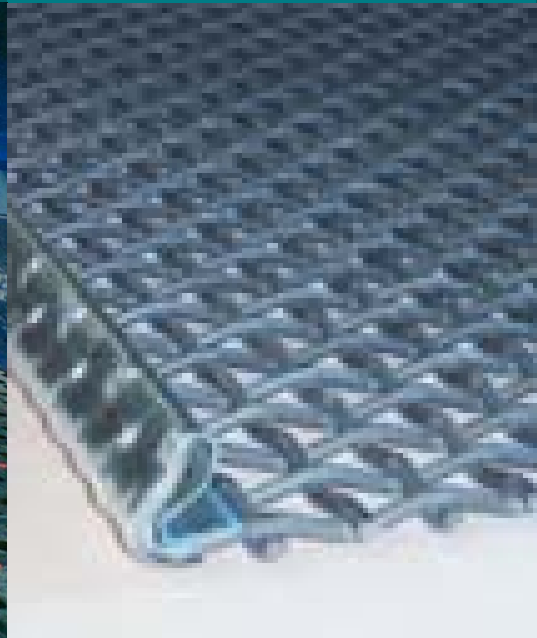

Rubber

Modular | Cross Tension

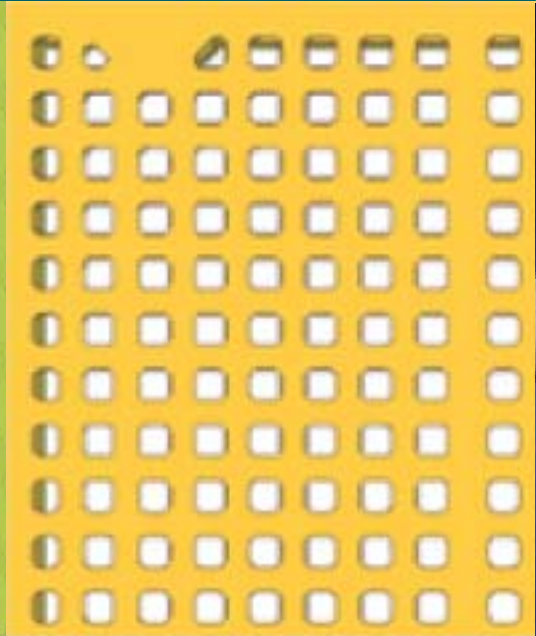

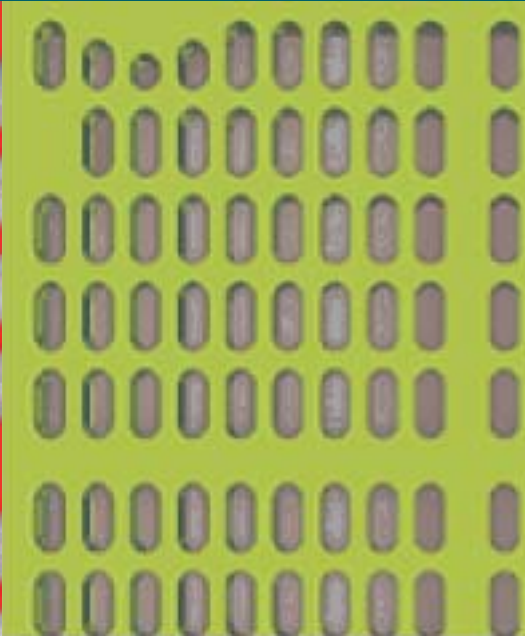

Woven Wire

Screen Openings

Screen Openings offer the ability to customise your screen deck(s) to accommodate particular production specifications or operational needs.

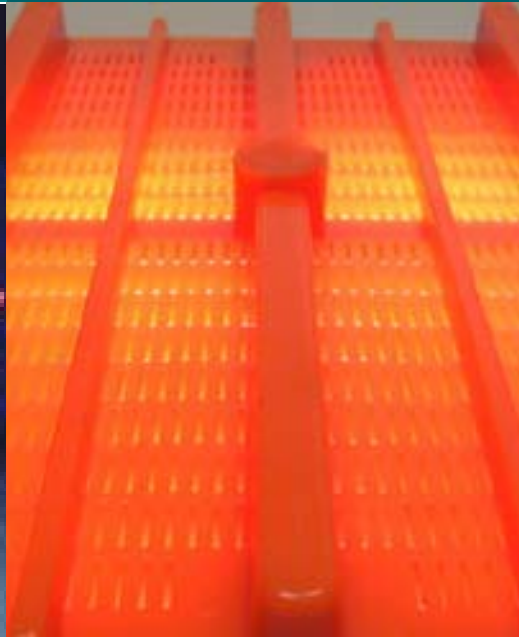

Panel Types

Standard, Maxi, Flexi, Reverse Moulded

Panel Extras

Weighing and lifting –
precisely and straightforward

Fixing Systems

A variety of options, depending on the
demands of your application.

Screenex Applications

Dry Screening

Wet Screening

Scalping

Sizing

High Moisture Screening
