

# DISOBOX<sup>®</sup> Basic Package

load cell simulator

DISOBOX<sup>®</sup>

DISOMAT<sup>®</sup> Tersus

- ❖ easy training of the innovative A/D converter DISOBOX<sup>®</sup>
- ❖ saving costs by efficient self-training in operation and use of the DISOBOX
- ❖ saving time by a quick orientation
- ❖ convenience of the special pre-configuration

Weighing electronics has developed substantially in recent years with fast-paced progress in engineering. Schenck Process DISOBOX<sup>®</sup> is a milestone in this development - an A/D converter that enables all static scales to show and evaluate additionally to the total weight the proportion of the weight transmitted by each individual load cell.

**Starting Point**

In order to apply the modern features of the DISOBOX as soon as possible, your maintenance and production staff needs a training.

**The application**

The DISOBOX<sup>®</sup> Basic Package is the optimum service package for efficient orientation in Schenck Process state-of-the-art weighing electronics. The complete preconfigured package consisting of DISOBOX<sup>®</sup>, DISOMAT<sup>®</sup> Tersus and the load cell simulator allows fast and effective “plug and play” self-training for service and operating personnel.

Documentation provided in the scope of delivery supports and guides you through orientation, additional phone support is also available for detailed questions.

**Pre-conditions**

The selected people for the self-training should have an operating knowledge of Schenck Process weighing electronics for static scales such as DISOMAT<sup>®</sup> Tersus or DISOMAT<sup>®</sup> B plus to efficiently take advantage of the DISOBOX<sup>®</sup> Basic Packages.

### How you benefit

- ✦ **You save money** with efficient worker self-training in operation and optimum use of DISOBOX®
- ✦ **You save time** with fast supported orientation
- ✦ **You get the convenience** of the special preconfiguration
- ✦ **You boost reliability and availability** for all important scales by a measurable improvement in diagnosis and preventative maintenance after installing DISOBOX®
- ✦ You get **reliable start-up** of new scales with DISOBOX due to prior simulation in the workshop
- ✦ You get **fast hands-on** self-training for design, service or operating personnel

Can we get you interested in the DISOBOX® Basic Package?

Do you and your staff need to learn how to operate DISOBOX® fast and easy to profit from its completely new weighing options?

Then our DISOBOX® Basic Package is just the right support for your first DISOBOX applications.

### Scope of supply

As you can see on the figure at the first page, the entire set consists of 1 DISOBOX® 4 channels, 1 DISOMAT® Tersus in the desk-top housing and 1 load cell simulator for DISOBOX®. The package is completely cabled, preconfigured and interlinked. A special documentation for self-training, standard manuals and Windows operating software for DISOPLAN® is also attached.

After completing self-training, you can dis-assemble the complete package and use it as new weighing electronics for scales in production.

Let us know your special needs.

Give us a call if you

- ✦ require a quotation for a DISOBOX® Basic Package
- ✦ are interested in a quotation for retrofitting your weighing electronics for specific and particularly important scales to take advantage of the benefits of the new DISOBOX® technology.
- ✦ would like to receive an additional quotation for a DISOBOX® and/or DISOMAT® training.

We're looking forward to your call!
