

Weighbeam DWR 50 ... 70 t

- Service temperature up to 120°C
- Separate mounting of connecting cable through connector
- Simple mechanical design
- Simple and economical installation through direct screwing onto the connecting structure

Application

- Scrap bucket, roller table weighing and tundish scales
- Silo and hopper scales
- Crane scales

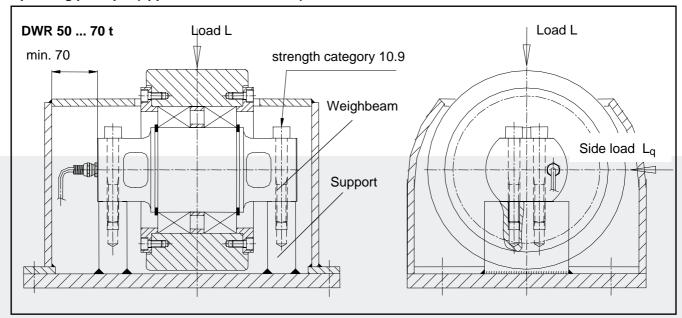

Construction

- Rugged design, low headroom
- Plug-in connector
- High-grade stainless steel

Function

- Simple and economical installation through direct screwing to the connecting structure without movable parts
- No need for additional tie-rods and hold-downs
- High long-term stability
- High degree of repeatability
- Separate mounting of weighbeam and connecting cable possible
- Easy cable exchange

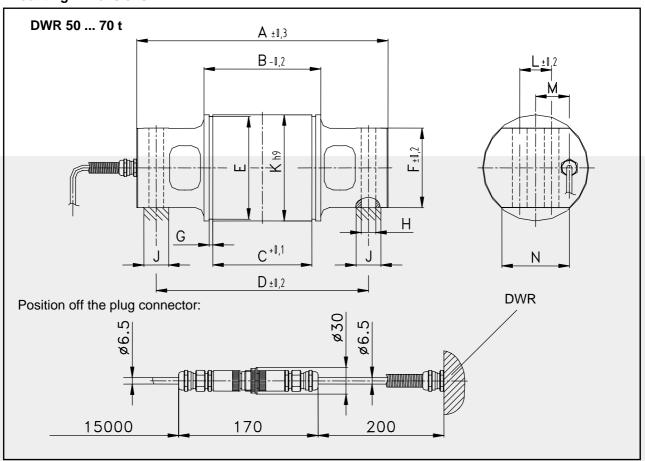

Operating principle (application tundish scale)

Technical Data

| | | DWR 50 t | DWR 60 t | DWR 70 t | | Reference | |
|---|--------------------|--|-----------------------------------|----------------|--|------------------|--|
| Rated capacity | E _{max} | 50 t 60 t 70 t | | | | | |
| Limit load = Maximum admissible load | Lı | 100 t | 120 t | 140 t | | | |
| Rupture load | L _d | 150 t | 180 t | 210 t | | | |
| Max. admissible side load (with screw friction) | L _{qmax} | 5 t | 5 t | 5 t | | | |
| Max. admissible side load (with form fit) | L _{qmax*} | 35 t | 42 t | 49 t | | | |
| Sensitivity | C _n | 1,3 mV/V | 1,0 mV/V | 1,1 mV/V | | E _{max} | |
| Combined error | F _{comb} | | | C _n | | | |
| Creeping under load (30 min) | F _{cr} | | | C _n | | | |

Dimensions E and G for retaining ring DIN 471

Recommended tolerance of the bore (dimension K): F8

Connecting surface quality requirements

- Material quality "A":
 Usually construction steel of a minimum quality S355 is used
- Plate thickness "B":
 Depends on stiffness of total
 construction. Plate thickness of
 connecting surface must be at
 least 40% of the weighbeam
 height (dimension F on page 3)
- Surface quality "C": Requisite mean roughness of the connecting surfaces is 6.3 µm
- Planeness "D":
 Maximum admissible planeness tolerance within the two outer conjoint connecting surfaces for each weighbeam is 0.05 mm

Angular deviation error to vertical axis "E":

Angle deviation of connecting surface to vertical axis in both planes of view must not exceed ± 2°

Plane parallelism "F": Upper and lower connecting surfaces to the weighbeam have to be plane parallel to minimum 0.1 mm

Plane 1:

Possibly execute load input convex (detail "X").

Plane 2:

Construction is angle compensating (also for elastic deflections).

| Variant | Order No. | | | | | |
