

Weighing and Feeding Accessories

- Offering a wide range of weighing and feeding product accessories such as belts for our Multidos® DMO and Multidos® DEA weighbelts, idlers, and motors.

Belts

Belt options for the MULTIDOS® DMO Weighbelts

- 24", 30", 36", 42", 48", 54", and 60" belt widths available (special designs up to 72" available)
- Standard lengths: 7'8", 20'2", and 30" increments
- Belt types: flat, 1" side gum-drop flange, 3" corrugated flange and 5" corrugated flange
- Other belt types available based on material characteristics

Belt options for the MULTIDOS® DEA Weighbelt Feeders

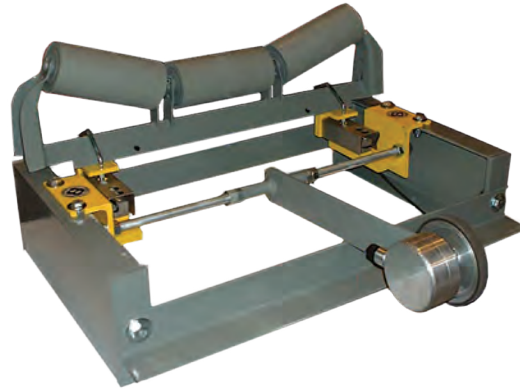

- Belt widths: 12" (300 model) and 24" (600 model)
- Belt material: white polyurethane, FDA approved
 - other belt materials are available for high temperatures or extreme chemical exposure

Idlers

Modular BEMP™ Belt Scale

The Modular BEMP™ Belt Scale is suitable for use with trough or flat idlers 18" to 60" (450 mm to 1,500 mm) CEMA. Accuracies: ± 1 % totalized weight over a 3:1 design capacity range when installed on a Schenck Process- approved conveyor. Dual-idler belt scales with ± 0.5 % accuracy are also available.

Motors

Schenck Process offers a wide variety of motors for all weighing and feeding products.

Options

- AC/DC motors
- Explosion proof
- Chem-duty washdown options
- Horsepower upgrades
