

Training

Well-trained personnel are the basis for your success. We won't leave you on your own!

Expand your know-how. Schenck Process GmbH has years of experience in the field of customer training. Our training programs give you a broad basic knowledge of the areas of industrial **weighing, feeding and automation technology** and documentation on the products incorporated. The training takes place in a learning-oriented atmosphere. This atmosphere is encouraged not only by the practically-oriented teaching aids, but also by the small group size.

Regular alternation between lectures and practical exercises with the devices ensures maximum retention. The seminar rooms are furnished with test equipment, control electronics and all the necessary training documentation. Our instructors are specialists with years of experience in weighing, measuring and automation technology and convey what they know in a lively, interesting way.

Benefit

Only some of the advantages for you at a glance:

- ✦ You will increase **process reliability** by avoiding incorrect operation
- ✦ You will **save costs**, as you and your employees will be able to rectify malfunctions yourselves
- ✦ You will **refresh your expertise** by exchanging ideas with specialists
- ✦ You will **secure your investment** by being able to give your devices optimum care during operation
- ✦ You will avoid costs through **efficient employee training**, thorough **development of expertise** and the **rapid training** of new employees

Target Groups

Specific training for employees in the following areas: operating personnel, service and maintenance personnel, commissioning and design engineers.

OVERVIEW OF THE TRAINING

Weighing and Feeding Electronics

DISOMAT[®] Satus
DISOMAT[®] Opus
DISOMAT[®] Tersus
DISOBOX[®] Plus
DISOCONT[®] Tersus
INTECONT[®] Satus
INTECONT[®] Opus
INTECONT[®] Tersus

Automation

Dispatch automation
Fieldbus communication
DISOCONT[®] Master Touch

Mechanical weighing systems

Function and design

- ✦ Loss-in-weight feeder
- ✦ Mass flow meter
- ✦ Weighfeeder
- ✦ Solids flow meter
- ✦ Beltweigher

Principles

Basic Training Vibrating Technology
Electromagnetic Compatibility (EMC) and Surge
Voltage Protection

Customer-specific training

We are always willing to adapt the contents to meet your specific requirements, e.g. for maintenance and service personnel familiar with weighing and feeding procedures who have specific questions concerning particular areas. Simply arrange a meeting in advance to discuss the topics and dates which are right for you (e.g. linking up to IT, function block assignment, EasyServe[®] or the entire DISOMAT[®] family).

Give us a call!

Training Venue

Right in the hub of it! Thanks to its central location, Darmstadt is perfect for training courses. Our recently opened TrainingCenter is easy to reach from anywhere in the world via Frankfurt airport. But we don't have to run the training course at one of our global sites, e.g. in England. Naturally, we can also hold a course at your place of business. Our flexibility allows you to make the decision.

In our new TrainingCenter you will find a practical training in a professional environment.

Registration
