

Principles

Basic Training Vibrating Technology

Training

**Well-trained employees are the basis for your success.
We won't leave you on your own!**

Whether large lumps or the finest grain, wet or dry and irrespective of whether using ore, scrap, lime powder or hot sinter up to 1,000 °C – vibratory equipment supplied by Schenck Process can deal with all types of bulk materials.

Our training gives persons attending a wide range of basic principles and a special technical know-how. Our experts will support you to learn more about vibrating technology.

Overview

- ❖ Basic knowledge of Vibrating Technology
- ❖ Operating instructions of Schenck Process equipment
- ❖ Details of components and functions
- ❖ Identifying and rectifying faults
- ❖ Maintenance recommendations

Target Group

Specific training for employees in the following areas: operating personnel, service and maintenance personnel, commissioning and design engineers.

Duration

1 Day (08:30– 04:30 p.m.)

Individual requests:

We are always willing to adapt the contents to meet your specific requirements. Work with us to develop a training course that meets those requirements.

Aim

Expand your know-how. Schenck Process GmbH has collected years of experience in the field of customer training. Our training programs give you a broad basic knowledge of the vibrating technology. The training takes place in a learning-oriented atmosphere. This atmosphere is encouraged not only by the practically oriented teaching aids, but also by the small group size.

- ❖ You will learn the theoretical fundamentals of vibrating technology.
- ❖ You will discuss the operating principles of the individual components.
- ❖ You will recognize the effects of incorrect settings.
- ❖ You will localize the causes of malfunctions and rectify them.

Constant switching between presentations and exercises ensure that your staff make the most of the training course. Our instructors are specialists with years of experience in weighing, metering and automation technology and convey what they know in a lively, interesting way.

How you will benefit

Only some of the advantages for you at a glance:

- ❖ You **boost reliability** by minimising incorrect operation
- ❖ You **save money** since you can rectify malfunctions yourself
- ❖ You **safeguard your investment** with excellent system service in the operational phase
- ❖ You **refresh your technical knowledge** by consulting experts

General Notes

Training Venue

Right in the hub of it! Thanks to its central location, Darmstadt is perfect for training courses. Our recently opened TrainingCenter is easy to reach from anywhere in the world via Frankfurt airport. But we don't have to run the training course at one of our global sites, e.g. in England. Naturally, we can also hold a course at your place of business. Our flexibility allows you to make the decision. In our new TrainingCenter you will find a practical training in a professional environment.

Registration

Please register online at www.schenckprocess.com. section service/customer training.

You will receive prompt confirmation of your registration.

Fees

The daily rate is given on the overview page. *Please understand that the training course will only take place if a sufficient number of participants registers (min 3 people).*

Accommodation

On request, we would happily make a hotel reservation for you.
