ABOUT THE
FOLLOWING
FEEDER
SERVICES**

FITNESSCHECK INSPECTIONS

- » Maintain accuracy, increase longevity and improve your process
- » Clearly defined report allows easy identification of problem areas such as performance, wear and structural issues.

ACCUCHECK CHAIN TESTING

- » Improve feeder accuracy to 0.25% in most feeder models and within $\pm 0.2\%$ of a comparable material test
- » One hour testing process
- » Improved boiler efficiency and heat rate

FEEDER CALIBRATION

- » Feeder and controls are adjusted to perform at optimal efficiency and maintain reliable operation and accuracy.
- » Recommended every six months

ENHANCE OR UPGRADE YOUR STOCK® FEEDER IN CONFIDENCE KNOWING THE PARTS ARE DESIGNED AND MANUFACTURED SPECIFICALLY FOR YOUR FEEDER.

Due to the variable quality of a third-party or non-OEM, components and services almost always result in sub-optimal performance leading to poor reliability, availability and accuracy.

STOCK® OEM PARTS AND SERVICES IMPROVE YOUR PLANT'S HEAT RATE THROUGH PRECISE AND CONSISTENT COAL FEEDING.
