

APP switch mode power supply development history

ModuPower™

ModuPower™ is the current Switch Mode Power Supply by APP. Its modular design, with voltages from 30 - 120 kV and unlimited current output, makes it suitable not only for APP's own air pollution control systems, but also as a very potent power supply for energizing of large electrostatic precipitators.

MP 30-50

More than 50 units are in operation worldwide, mainly with APP's Air Pollution Control system. These units have a nominal capacity of 30 kW at 50 kV.

HPV 12-40 and HPV 10-35

These initial versions of the power supply units are still running around the world at APP odour abatement installations.
